Education

Imam Mohammad Ibn Saud Islamic University — Riyadh, Saudi Arabia
Bachelor of Science in Computer Science (Third Year) — *Expected Graduation: 2027*

Technical Skills

Languages: C#, C++, SQL (T-SQL), Java, MIPS Assembly
Frameworks & Libraries: .NET Framework (Windows Forms), ADO.NET
Tools & Databases: Microsoft SQL Server (SSMS), Visual Studio, Git/GitHub, ERDPlus
Core Concepts: Multi-Tier Architecture, Relational Database Design, OOP, Competitive Programming

Honors & Competitions

2nd Place – Algo Arena Competitive Programming Contest — Imam University
Algorithmic Problem Solving & Data Structures Contest — *Riyadh, Saudi Arabia*

- Awarded 2nd place among university participants for solving complex algorithmic and mathematical problems under strict time and memory limits.
- Applied optimal data structures, dynamic programming, graph traversal, and complexity optimization techniques.

Technical Projects

Driving & Vehicle License Department (DVLD) System — C#, .NET, SQL Server
Enterprise Desktop Application (ProgrammingAdvices) — *Riyadh, Saudi Arabia*

- Architected a multi-tier licensing management system using **C#** and **.NET Framework**, cleanly decoupling the Presentation Layer, Business Logic Layer (BLL), and Data Access Layer (DAL) via **ADO.NET**.
- Designed a normalized **SQL Server** database enforcing data integrity across drivers, licenses, test appointments, and fee structures.
- Implemented lifecycle modules including test appointment booking, license issuance, renewal, and detention/release with fine settlement.
- Engineered role-based access control (RBAC), password hashing, audit logs, parameterized queries, and stored procedures.

Interactive Typing Speed Assessment (TypeRacer Mock) — C#, WinForms
Personal Project — *Riyadh, Saudi Arabia*

- Engineered a desktop application to track and measure real-time typing speed, accuracy, and key stroke latency.
- Implemented low-level key listeners, event handling, and real-time WPM calculation algorithms.

Algorithmic Implementations & Data Structures — C++
Academic & Competitive Programming — *Riyadh, Saudi Arabia*

- Implemented core data structures and algorithms applying OOP paradigms and optimal time/space complexity analysis.

Leadership & Campus Engagement

Leader – Technical Challenges Committee — Imam University
Robotics and Wireless Sports Club (RRC) — *2025 – Present*

- Lead the planning and execution of competitive technical challenges, problem sets, and practical hackathons.
- Coordinate technical workshop tracks, organize problem sets, and evaluate student project submissions.

Head of Technical Support — Imam University
VTECH Bootcamp / Workshop — *2025*

- Supervised technical operations, resolving environment setup, tool configuration, and database connectivity issues.
- Ensured technical readiness and zero operational downtime across all practical sessions.

Certifications & Professional Development

Software & Database Development Roadmaps: Completed 18+ intensive roadmaps covering C++ Foundations, OOP, Data Structures, and SQL Server Practices (*ProgrammingAdvices*).
Data Science Foundation: Completed data analysis and statistical foundations track (*Satr Academy*).
Industry Conferences: Active attendee at major tech exhibitions including **LEAP** and **Biban**.
